

Report Launch: Towards an Anticipatory Innovation Governance System in Finland

International webinar 3 November 2022, 13:00-14:30 CET

Please register [here](#)

The official international launch of the report “[Anticipatory Innovation Governance Model in Finland: Towards a New Way of Governing](#).” The report examined how Finland has been incorporating anticipatory functions within its governance system to deal with complex and future challenges in a systemic way.

Together with the Finnish Government and the European Commission, the OECD will share the learnings from co-developing the Anticipatory Innovation Governance model in Finland over the last two years. The principles and functions of the model are explored in practice and a critical look is taken to how the model could be applied in other countries.

Time (CET)	Item
